YOUR Opportunity

Information Technologie

Internet business 2009

You do know however that people are making a great living every day from home with Internet businesses. You probably even know some of these people. I'm one of them

And believe me, there is absolutely no reason why you can't create a very profitable Internet business yourself.

That's what you're searching for right now, and I have good news for you.

You can!

Many Authors' mess everything up for you, and you probably suspected that most of the business opportunities on the Internet today are scams. You are absolutely right.

More than 90% of them are designed to take your money and leave you with nothing, not even knowing how to ask for the refund they promised…

Before we train you on how to start marketing business, I suggest you get a two e-mail address. You are going to get a lot of mail offers from posting to many of these sources. You will never need to read any of these e-mails, many are people trying to sell you offers for additional promotional methods that cost money. You can get a e-mail's address for **free** at **Google** or YAHOO

Part 1 Affiliate Promotion

*E*ach company will assign you a different affiliate promotion link/hoplink to use in your data submission postings. This is how all your earnings are tracked back to the company.

We are going to give you training on how to obtain these links for each of the companies to assure you get credited with your earnings.

First will explain how these companies will pay you. When you select a company you want to market for, you will see what each company will offer in compensation for your efforts. Many will pay you a commission of anything your efforts bring in, some will pay you for just leading the prospective buyer to them, and some even pay you for having someone click on their Web site. You can choose each company based the compensation they are willing to pay; if you feel your efforts are worth more than what is being offered for pay compensation, you simply don't have to work for that company

If the company is willing to pay commissions, they usually will make it worth your while. For example, If one of our Web-based companies is selling their service and/or digital products for $99, they may be willing to give you 70% of a sale that your typing the data submissions efforts provide, that's $69.30 for EACH sale. In many cases, with digital products you can make more then the actual Web site selling the product, and you NEVER have to do any follow-up, answer any e-mails, or deal with any customer.

Companies that pay for leads

There are many companies that will pay you for what is called "Leads." It works this way: if someone simply visits the Web site you are marketing, and maybe signs up for a newsletter, or free trial, etc. you will get paid. Some will pay you as little as $1.00, and some up to $10.00 and **NOTHING HAS TO BE PURCHASED**.

Companies that pay for clicks on their site

There are selected companies that will pay you every time someone simply clicks on their sites through your marketing efforts.

The first administrative account is called **Clickbank,** who will list over 11,000 companies willing to pay you for your data submissions. They will pay you twice a month on or around the 1st and 15th.

The second administrative account is called **PayDotCom.** They represent over 7,000 Web-based companies. Each company in PayDotCom's data base will pay you separately, and each company's pay dates are different. You will be paid the month after you have earned money

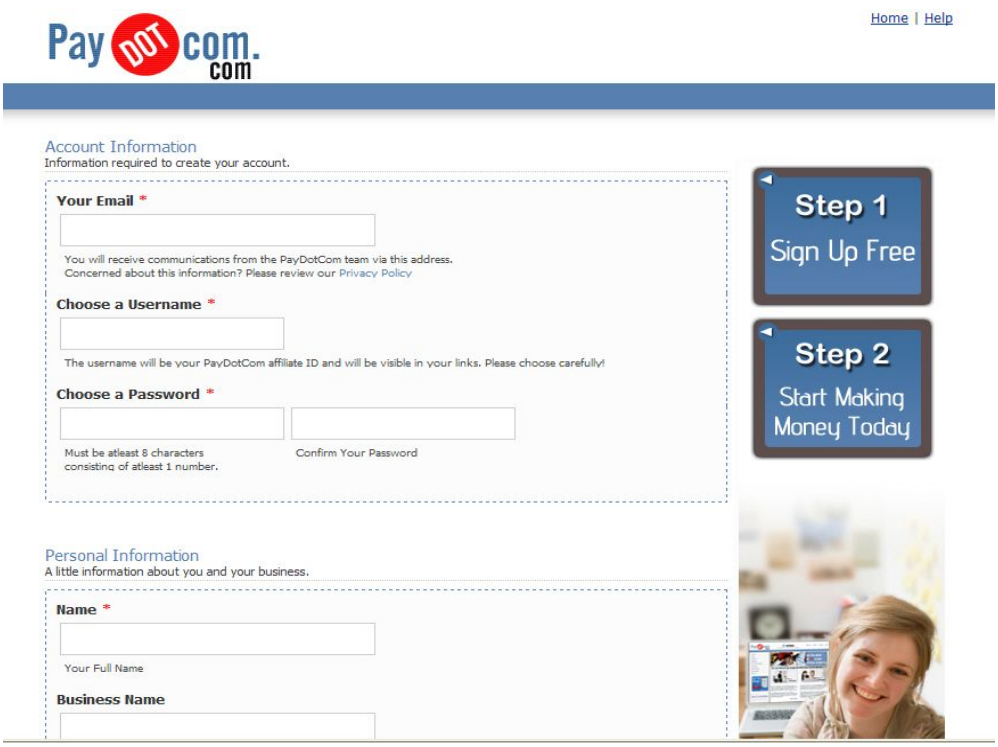
This book is supplied for information purposes only and as experience in this subject matter as the contributors are, the material herein does not constitute professional advice.
The e Book is Copyright by AGE Service

I will going to show you from getting signed up with your two admin accounts (Clickbank and PayDotCom) which are both 100% free, and simple to sign up with. and show you how to select companies to work for, get your affiliate promotion links/hoplinks, and where to post these links on the Internet.

Getting Signed-Up with PayDotCom Administrative Account

PayDotCom is a 100% free to join, and you are never, EVER charged for their service! Remember, the companies you are working for are paying the administrative costs. The only people that have to pay at PayDotCom.com are the companies listing their Web sites. It is VERY IMPORTANT that your username is what you will use to create the special promotion links for all the companies you will be doing work for. So make sure it is professional looking to these companies.

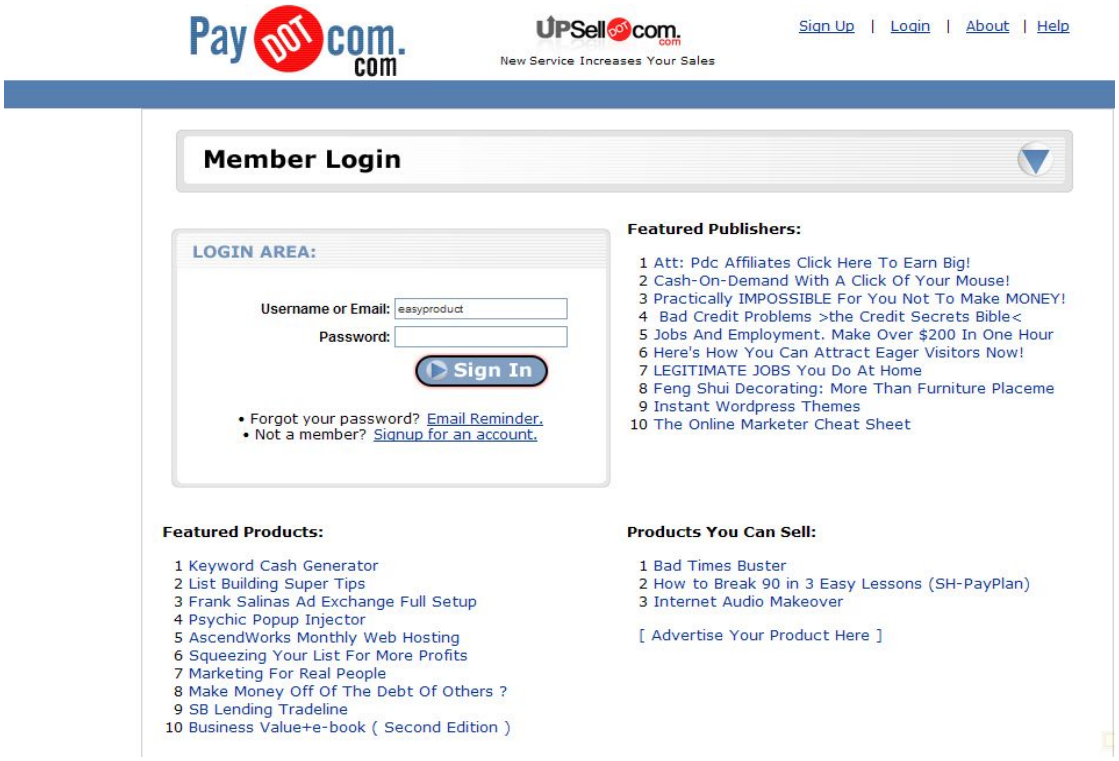
To begin the sign up process with PayDotCom
CLICK HERE



Click on the **"SIGN UP"** button at the top of the page

This part will be your personal information such as: choosing a username and password, your personal contact information, who you want your checks made out to, where you want them sent, and your SSN or EIN so they can process your tax information. You will only need to fill in the SSN or EIN if you are a U.S. resident.

After you have filled in the information required, you then will check off the next two boxes, receive notification, and most importantly is to agree to PayDotCom.com's terms and conditions.



This book is supplied for information purposes only and as experience in this subject matter as the contributors are, the material herein does not constitute professional advice.

Account with your Name

Short explanation

My Sales
Here is where you can get detailed reports on your earnings from each company for any particular time.

Sales Activity
This feature is similar to the "MY SALES" but is limited to earnings for the day, the last seven days, and the last thirty day.

Promote Products
When it comes time to choose any of the thousands of companies to promote, you will choose this option.

My Affiliate Sales
Here is an up-to-the minute place to check your daily, last seven-days, and last thirty-day

earnings.

Don't worry about the "**MY PRODUCTS**," "**PROMOTION CENTER** "**MANAGE AFFILIATES,**" or any of the "**MAKE PAYMENT**" features of your PayDotCom account. These are all for companies that are promoting their own sites on PayDotCom's marketplace.

How to Select Companies for

log into your PayDotCom account,

After you have logged into your account, click on the **"PROMOTE PRODUCTS"** and then the select sub-menu **"FROM MARKETPLACE"**

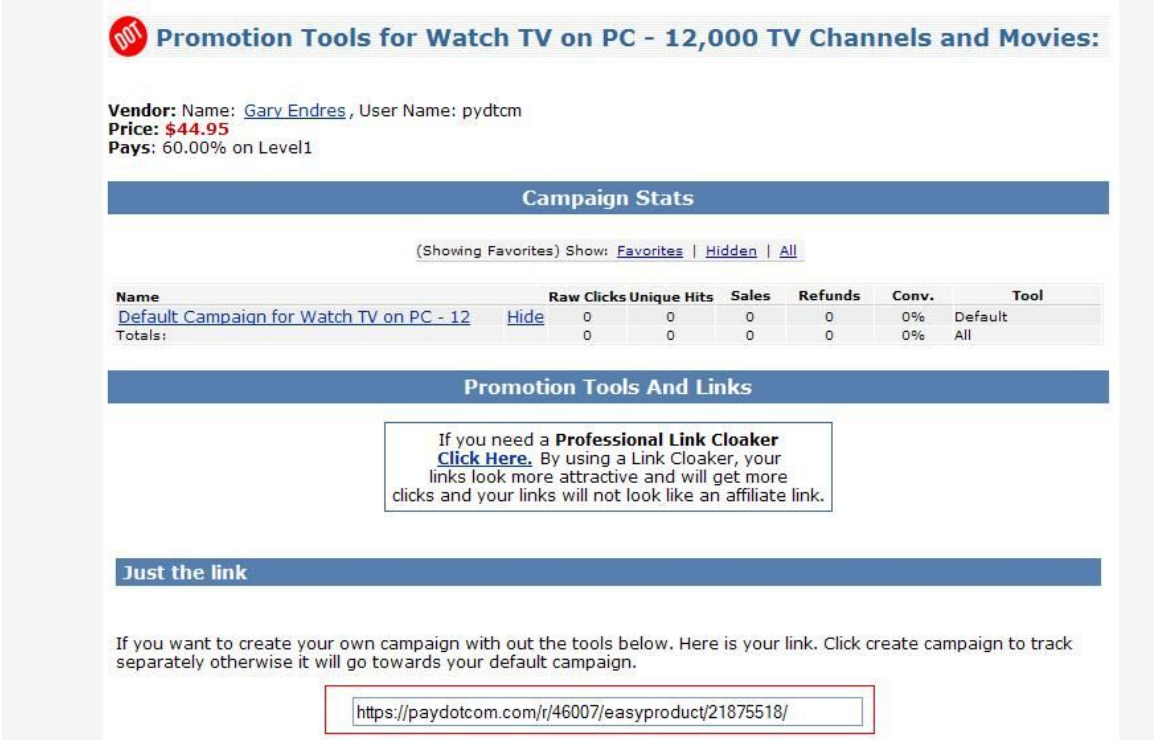
On the marketplace page you will be able to locate any of the thousands of companies using two methods

Search: You can search for a particular company by name, or by the type of product they are selling, e.g., "Work from Home," "Internet TV," "I-POD," etc.

Product Category: You can select companies by a particular category, such as: "Computing & Internet," "Money & Employment,"

For now we will search for a company using the search box. We are going to type a search for a popular product, "**9000 Satellite TV Channels**" After you type a search for "**9000 Satellite TV Channels**" in the search box

Promote: When you decide to promote a company, you will click on this **"PROMOTE"** button to retrieve your special affiliate promotion links that are needed to add into all of your data submissions.



The red box is your special affiliate promotion links

Promotion Links

Every company will assign you a Web-site link URL (Uniform Resource Locater) URLs are how the World Wide Web (Internet) identifies Web sites based on a special address, which is the URL

The promotion links will work the same way since each company will embed special characters into their URL links that will identify you as the promoter, thus creating your promotion link.

These promotion links will only identify you as the provider, and when someone clicks on your promotion link to enter any of these companies Web sites, you will be credited for the visit. You will earn if that particular person were to purchase, try a free offer (lead), or for the visit itself, depending on the company. As mentioned each company will list how they will pay you before you decide to do any promotions for them. Some of the affiliate promotion links/hoplinks are very long, so we suggest you copy and paste your links when it comes time to get these links for promoting. If you do not know how to copy and paste, you can go to the following link

You will find your promotion link on this page under the section that says **"Just the link"** You will need to copy the complete link including the **"https://"** So, as for our example, our promotion link is:

https://paydotcom.com/r/13541/yourname/115345/

The **"yourname"** in the promotion link will be replaced with **YOUR** PayDotCom **username** you chose when you signed up with PayDotCom.com.

Publisher

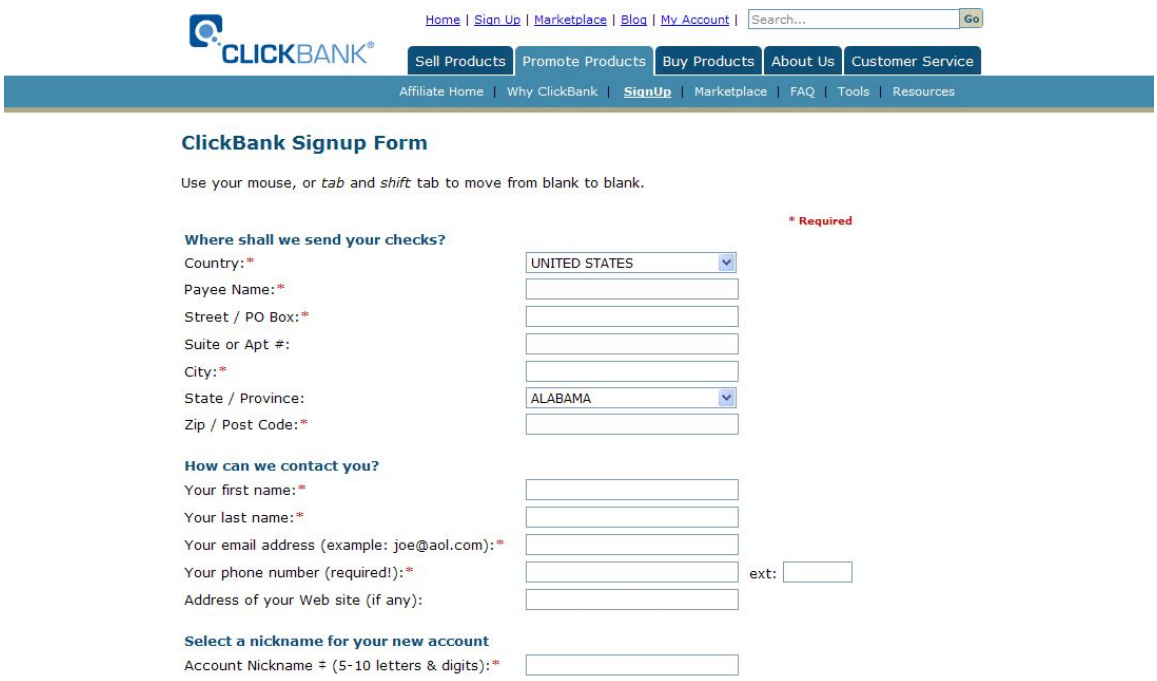
This is the unique code for the company you are promoting. This is how PayDotCom will track your promoting efforts for any of the companies your promote. Each affiliate promotion link you create for each company will have a different Publisher Numbers.

The second administrative account you will want to sign-up for is Clickbank.

CLICK HERE TO SIGN UP

www.clickbank.com

You will be on the following sign-up page



Enter your account information, address, phone number, and e-mail address. Same like you did before

When asked for **"Address of your Web site" - LEAVE BLANK** (Not for affiliate Program)

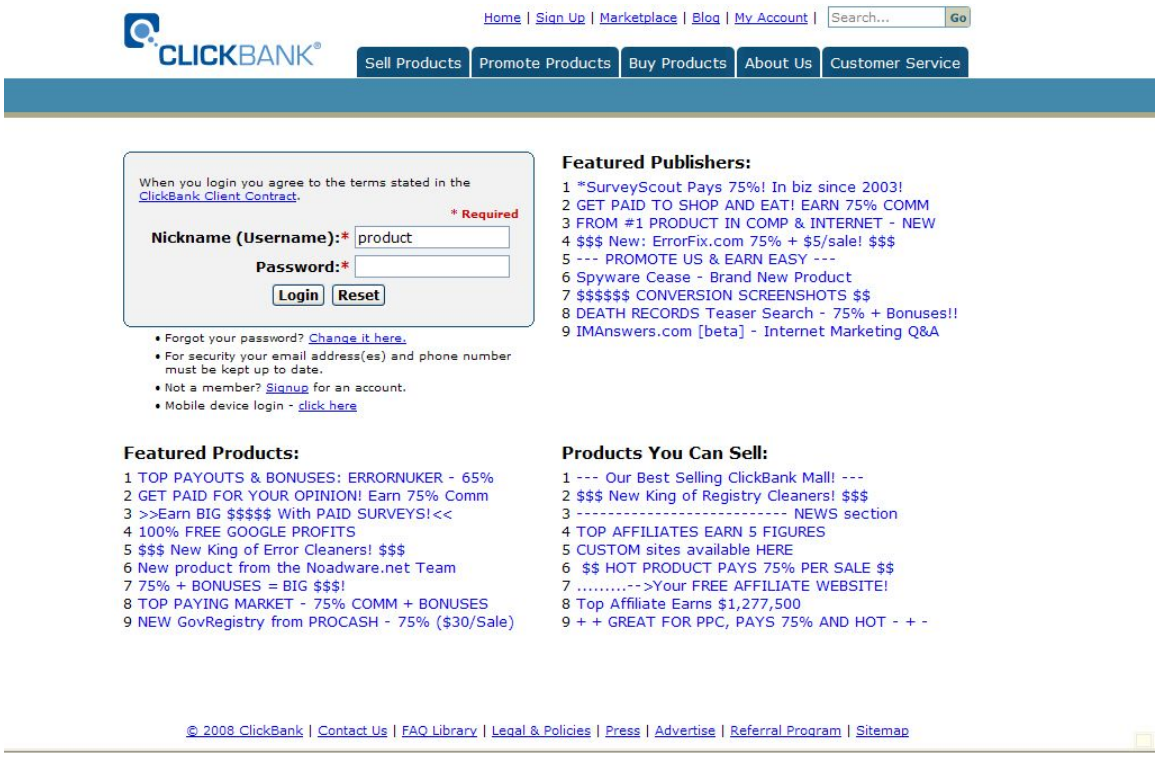
When choosing your **"Account Nickname"** keep in mind that this nickname will be displayed in all of your data submission postings so keep it professional. Using your first initial of your first name, then using your full last name or visa versa will work fine.

After filling in all of your information, click **"Submit"** make sure you **do not close your window after submitting**. You are going to need to go to your e-mail and get a special confirmation code to enter in the next screen. Make sure to save this e-mail, because this confirmation code is also your password.

After you have entered your confirmation that Clickbank has sent you, click **"Submit"** and your account is approved and ready to access.

Logging into your Clickbank account

To login to your Clickbank account go to **http://www.Clickbank.com,** then select **"My Account"** located on the upper right portion of page. On the 'My Account" page you will use your Nickname as the username and the confirmation code for password. After you have entered your username and password click **"Login"**



Account Home This is the page you will be on when you first log into your Clickbank account.

Account Settings In the account settings you can change your personal information, set your payout request amount, and add your EIN for tax purposes.

Reporting The reporting will give you details of how much money you have made on particular pay periods. You can locate which submission produced the earnings by selecting "Reporting," then "Transactions." This will display each of your submission earnings by the vendor name; it will also tell you who made the purchase and where they are located.

Pay period Sales Subtotals This will display current and most recent pay totals for particular pay periods. This is where you can look to see how much you next check will be for the next pay period.

Daily Sales Subtotals You can login at and you will see your earnings for each day. The earnings are calculated in real time, which means that when one of your data submissions creates a sale/commission, it is reported to this screen.

Marketplace this is where you will select the company or companies are want to type your data submissions for. We are going to go over that in the next section of this training. You do not need to create products, set up anything else with the exception of adding your EIN and setting you payout threshold in your account settings.

Select the Companies in ClickBank

After you are logged into your account, click on the **"MARKETPLACE"** button on top right of page

Search the Clickbank Marketplace: Here you can search for a particular company, or a type of product or service offered

List of Categories: You also have the option to search for companies by categories, and sub-categories such as "Business to Business," "Marketing & Ads," etc. For example, if you wanted to find the company for diets you would look for them under "Health & Fitness."

For our tutorial click on **"Business To Business"** on the list of categories

$/Sale: Average net amount earned per Clickbank member (this is you)per referred sale. Note that this is the net amount earned per actual sale; it is impacted by refunds, charge backs, and sales taxes

Total $/Sale: The sum of all initial sales and re bills divided by the number of initial sales. It is the average total $per sale, including all re bills that may come from that sale.

%/Sale: Average percentage commission earned per affiliate per referred sale. This number should only vary if the publisher has changed their payout percentage over time

% Referred: Fraction of the company's total sales that are referred by affiliates

Gravity: The number of distinct affiliates who earned a commission by referring a paying customer to the company's products.

Create Hoplink: If you were to decide to work for any of the Clickbank companies this is where you will get your affiliate promotion link also known by Clickbank as Hoplink that you will use to post in all of your data submissions. This will be the link you place into all of your data submissions that you will be posting to Internet in part

When click on **Create Hoplink** a separate box will pop up

Clickbank Nickname: In this box enter your Clickbank nickname (sign up name).
Tracking ID: This is only for Web site owners,YOU WILL NOT USE THIS FEATURE.

After you have entered your Clickbank nickname, click **SUBMIT**

Your affiliate promotion link or as Clickbank will refer to it as your "hoplink" will now be displayed as we show in the box above. The complete hoplink is:
http://nickname.freegoogle.hop.clickbank.net/

Before we going to part how to promote links, couple thinks that you have to watching:

- Is it professional looking?
- What is its impression on you?
- Would you purchase this product if this was what you were looking to buy?
  Does the Web site get its selling point across?
- The site is NOT full of irrelevant information?

I will show you the marketing tools available on the Internet, some tools that are free, and some that have additional costs. It will be up to you to decide if you want to make an additional investment when it comes to promoting your companies. If you are **not willing to spend** additional money, that is good, you can still succeed. If you decide to invest additional money into promotion, we assure you that you will not be spending money for sign-ups, more software, etc. You will only be spending money when you have the possibility of making an income in return. We will also explain the advantages and disadvantages of both free and paid promotion tools as well.

Posting to FREE promotion Tools

The best way to use the free promotion tools we provide is to work with one company at a time, and submit it using all the tools we have. Once you have posted your company to all the free posting tools, then you can choose another company from any of the three sources (PayDotCom, Clickbank) and post them down the line of free tools. You will keep repeating this as often as you wish. After each month, you can start over with the first company you posted, and so-on and so-on. You do not want to post the same company more than once a month to the free tools we list, but with all the companies that are available this should not be a problem.

After you have selected any of the thousands of companies from PayDotCom, or Clickbank, you are going to want to do a little research on the particular company you

have chosen. Start by visiting the company's Web site and take note of some key selling points the company is making to its buyers. Act as if you are the buyer; look for features that would catch your eye about the company's product. For example, if you are promoting a certain company and they offer free shipping on all their products, make a note of that; or note if they are offering a special 10% off certain items, if they offer a money-back guarantee, or have special bonuses. Once you have a good idea of what the Web site is offering, along with their special selling points, this will make it easy to create your titles and descriptions

You can post as many companies as you would like to these posting tools. However, I suggest you do one at a time. We will list the posting frequency for each company in each of these tools, along with the destination where your promotion link will end up, and the approximate time it will take to post to the destination source and to start seeing results.

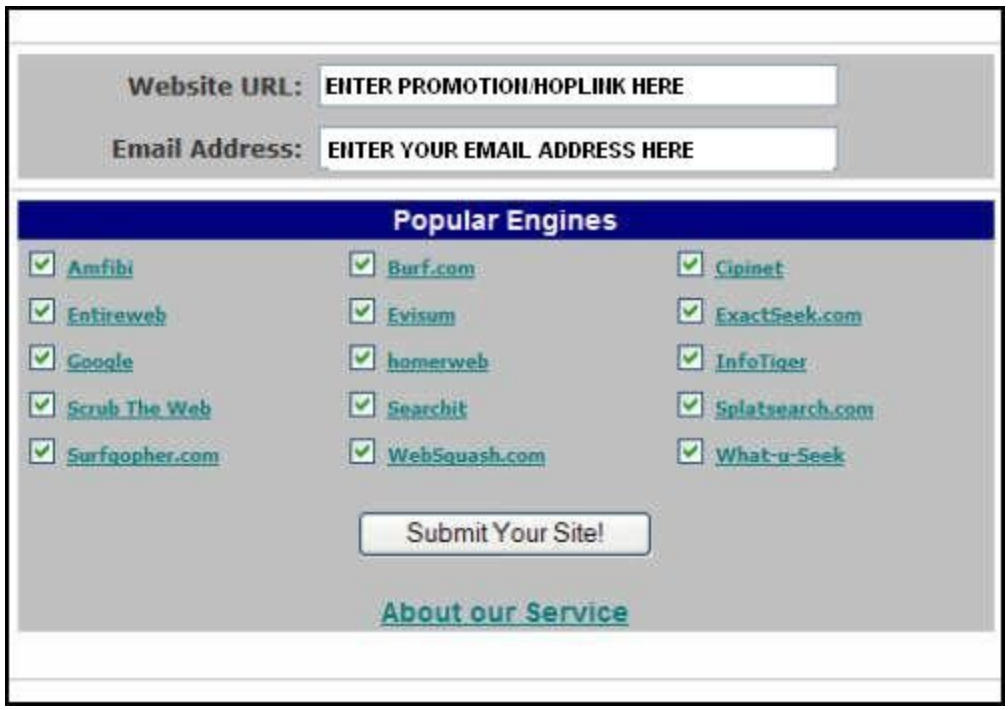
Important: When posting your promotion link for **PAYDOTCOM** companies you will need to REMOVE the **"S"** in the **"httpS://"** of your promotion link so it only reads **http://**

Option 1

Step 1

Go to this link: **http://www.hostned.com/resources_site_submit.htm**

After you go to Hostned Web site the screen will look like the following:



Step 2

- Enter your **PayDotCom promotion link** or **Clickbank Hoplink** for the company you are submitting in the first box **"Website URL"**

- Enter your e-mail address in the second box.

Make sure to put checks on ALL of the search engines, then click on the **Submit Your Site!** button.

Step 3

Go to your email and check for a confirmation email. Click on the confirmation link in the email that is sent. You promotion/hoplink is now submitted. It is possible that a confirmation email may not be sent, don't worry your link is still submitted as it is a random process to confirm your link

Even know Hostned only submits to 15 search engines, your links will still get indexed on hundreds of additional search engines. The reason is that hundreds of search engines feed off the search engines Hostned list. The search engines will be able to use the actual company's Web site settings that you are promoting to get the title and description, but then will use your link. This will assure you will get credit for the sales on the site.

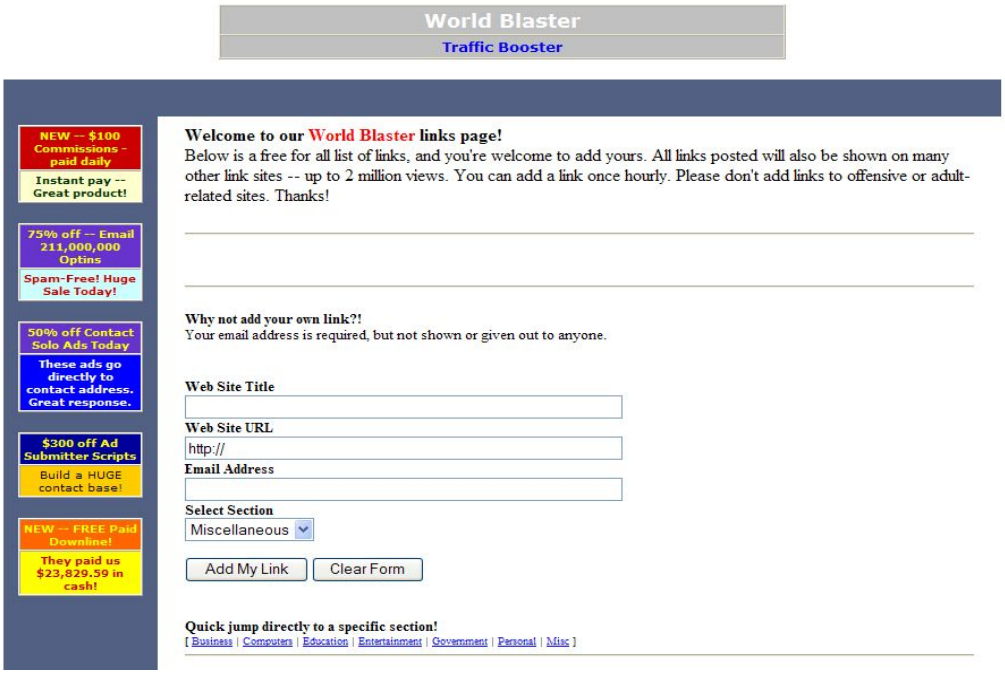
Option 2

Ad Directories

Posts instantly - will take about 3 -5 days to appear in directories Post each company ONCE every 30 days

Step 1

These are Web-based sites to post to, so you do not need to download anything. Go to the following links: **WORLD BLAST** **LIST SOURCE**



Web-site Title: You will enter a title about the company you are promoting

Web-site URL: Enter your **PayDotCom link** or **Clickbank Hoplink** for the company you are submitting

Email Address: Enter your e-mail address here

Select Section: - Select the category that fits the company you are promoting

select **Add My Link** and you are done

NO Sign-Up Classified Sites

Alamonet - You must select the category on their index page first, then select the green box that says **Post Ad**

I will give description for www.craigslist.org only, the all the same

Craigslist is one of the simplest ways you will find to post your data submission ads. Craigslist is also the largest free classifieds on the Internet, and receives over 15 BILLION page views a month from over 20 million users. Imagine the results with this many readers, it is pretty amazing. There is another benefit of posting to Craigslist besides getting quick results, the ads you post can get indexed by the search engines. If you go to Google.com and type a search for various items, you will see that Craigslist ads actually get indexed on the first pages of Google. So you could have your ad seen by millions of people doing searches on Google as well. Even when your ad expires on Craigslist, it will stay active for months on Google. These are great reasons to use Craigslist to increase your income potential.

Basic rules for Craigslist

There are a few basic rules that you will need to keep in mind when posting to Craigslist.

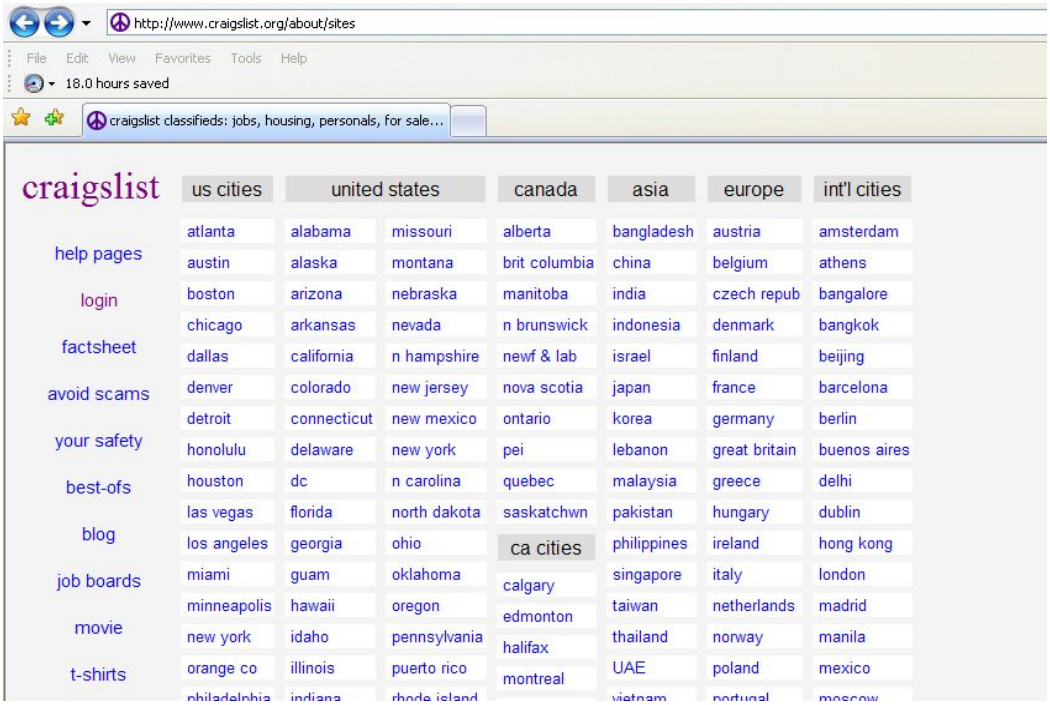
1) You can only post one ad to one location. You can post as many ads as you would like, but not the same ad to more than one location. Once your ad expires you can repost it to the same location, or to another location. So if you want to post the same company to more than one location, you would have to type a completely different ad to post it to another location.

2)You will NEVER post to the **Jobs** section of Craigslist, because it costs money and there are strict regulations to meet to qualify for posting to the "Jobs" category.

3) You cannot make false promises in your ads. For example, if you type *"Join today and get a free MP3 player."* I will show you some features that will get the readers attention without being deceptive.

4.) you cannot post your affiliate promotion link in your classified ad. I going to show you an alternative that works great.

Lets go to www.craigslist.org



Click 'login"

craigslist: Account Log In

Log in to your craigslist account

NOTE: Not all prior posters have craigslist accounts.
If you are not sure, check for the existence of an account by having your password reset.

Email / Handle:

Password:

Log In (Cookies must be enabled.)

Click here to sign up

craigslist: account signup

To create an account, enter your email address below, and type the verification word you see in the box. (what's this?)

email address: 2xproduct@gmail.com

verification word:

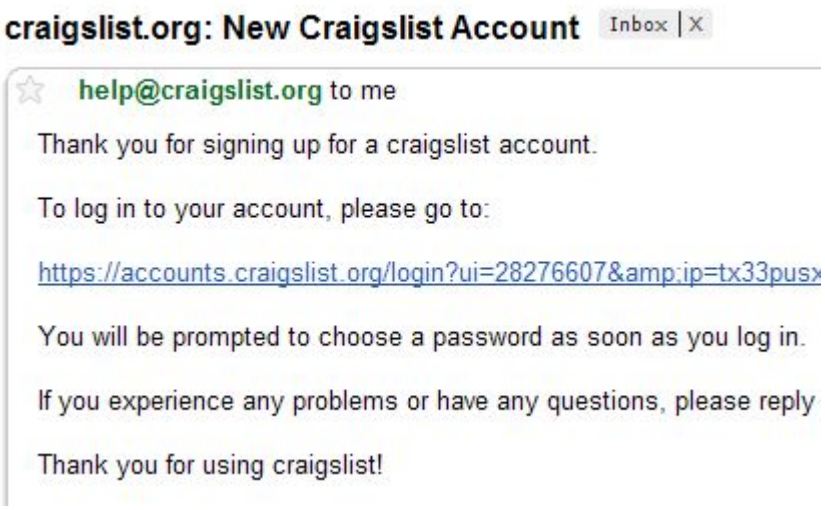
stop spam.
read books.

create account

Thanks for signing up for a craigslist account.

A link to activate your account has just been emailed to **2xproduct@gmail.com**

Step4 check your email



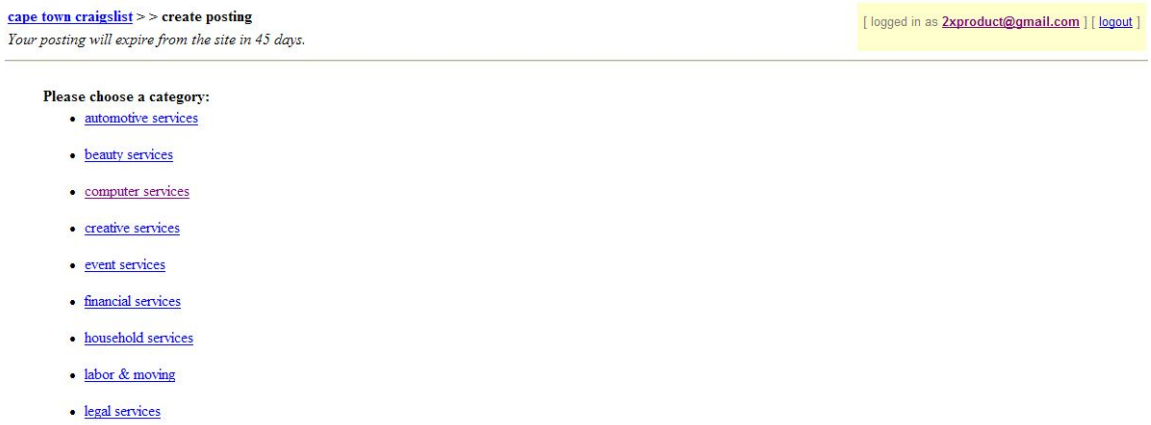
Step 5 after choosing the password you should be here

To start your ad, you will need to select a location. There are two ways to look at this. First,you can choose a large metropolitan area like New York, Chicago, L.A, San Francisco, etc. The upside to this is that you will get more possibilities of traffic. The downside to posting to large metro areas is you will have a lot more competition with many more ads listed.

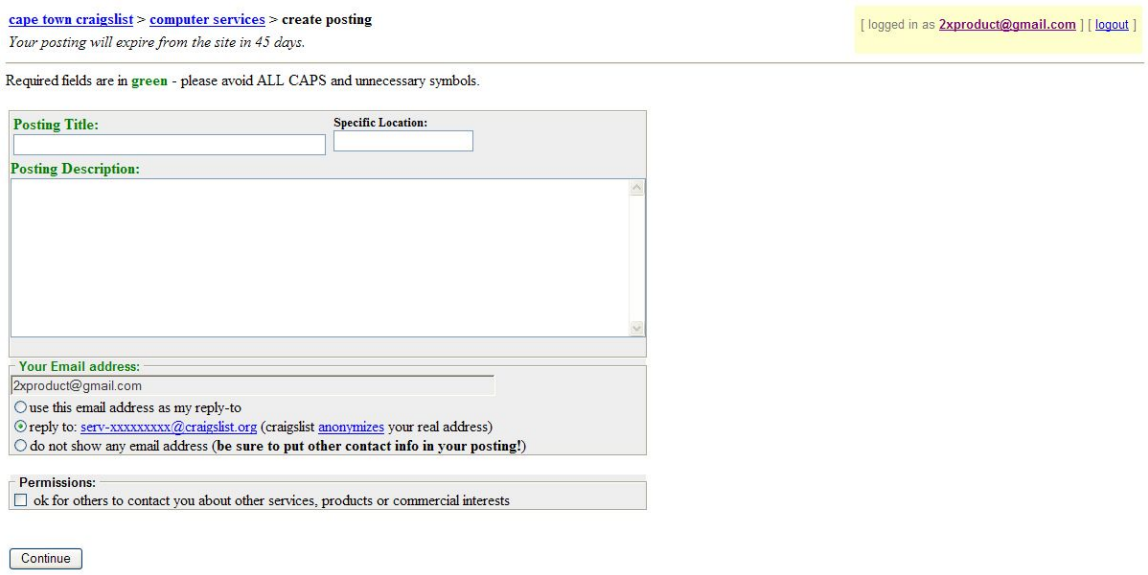
Second, if you choose to post to a smaller location, you will not have as much traffic as the larger areas, BUT you will not have as much competition in the smaller areas.

You can experiment with either; the choice is yours.

After you have chosen the area you would like to post to, you will then need to select the "type of posting" for placing your ad. You can take a look at the different types of postings Craigslist offers to see if the company you are promotion may fit into a particular niche. Ninety-nine per cent of the time you are going to want to select the **"Services Offered"** category



You will then be brought to the ad-posting screen that looks like this:



Posting Title: This will be the most important part of the ad because this is what the visitor will see first. The key to a good title is to get the reader's attention in the short amount of text you will post in the title line. Some great words to use in your title are: **"Must Read," "Save Money,"** and the best of all, **"FREE."** If the company's product is not free, then you will *not be able to post that*. However, if you are getting paid for a lead for a free trial, this is the best time to place *"FREE"* in your title. You must also make sure you give a brief description of what it is you are promoting. For example if you are promoting a free trial to a antivirus program, then your title would read: ***"The best antivirus program 30 days - FREE TRIAL!"*** You will want the reader to know what it is you are selling.

Specify Location: Leave this blank; you have already chosen your location.

Posting Description: Now you can go into more detail about what you are promoting. Always type your ad as if you are the person selling the product or service. So you will use words like: **"I," "ME," "OURS," "MINE,"** etc.

IMPORTANT part of your ad is letting the reader know to contact you for more details. The reason is that you will want the person to reply directly to your e-mail

you are going to list with your advertisement. Once the person contacts you through Craigslist, you will re-direct them to your affiliate promotion link/hoplink in your response e-mail.

You notice how we noted to contact us separately from the body of the ad description with the **"call to action"** of ***"To find out more go to."*** This is what you will want to do in all your ads on Craigslist.

Also take a look how this ad was written short and to the point, as well as being personable by using the word ***"my."*** Also pointed out was that this site **"Computer Service"** will give the visitor additional bonuses and a guarantee.

You always want to point out the good selling points from the company's Web site you are promoting will list.

Email: - You will then add your e-mail address, and the verify it by adding it again.

Reply To: - If you do not want to list your e-mail address in the description of the ad, leave this option on the default which will not list your e-mail address. It will be sent to a Craigslist e-mail, then directed to your e-mail address.

Responding to e-mails from your ad

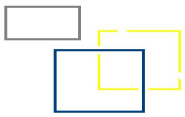
Once you receive an e-mail for any questions in regards to the ad you posted, you can then respond to the person e-mailing by re-directing them to the companies Web site by giving them your promotion link in the e-mail response. You would simply reply by saying something like:

"Go to this site to find out more and if you have any additional questions you can contact the Web site directly, and they can answer any questions you may have."

After you have selected the agreement, you will then be brought to the confirmation that your ad has been received for and a confirmation will be sent to your e-mail. Usually your ads will be running in less than 15 minutes after you post it.

Craiglist has made a lot of people rich who did exactly what you are doing here. For a 100% free method you cannot lose anything by using this service Craiglist offers.

Many people have been promoting their Craigslist ad links. We will explain what to do; you are going to still post whatever companies you would like to Craigslist ads. Every Craigslist ad you will create will have is separate Web address URL, which can be promoted by using all of the posting methods we provide. What this has been doing for our members is getting their Craigslist ads indexed on the search engines, as well as producing quick sales. As we mentioned to go to Google and do some searches, and you will see several Craigslist ads that have been indexed in their search engine, many of these may be current members.



Posting With Paid Methods

PayPal

You was presented with the free posting tools, and now I will show you with the paid methods. The biggest question we receive is. "Why?" The answer to that is methods we will show you will not cost any additional money UNLESS you stand to gain more money in return. Exactly what this means is that you are not going to just spend some money in advance and hope it works. We will use what is called the "pay per click" (**PPC**) method, in which you are only charged when someone views the company you are promoting. The advantage of using the PPC methods is that the people are actually looking for the company you are promoting. As you can imagine, earning commissions is much easier if someone is ready to buy, and that is why the methods we are going to show you work.

Ad Placement Service: What an advertisement placement service does is place the short advertisements you create, on hundreds, and even thousands of Web sites and blogs. Your advertisements will get the maximum exposure to thousands of people. This works well because you will be able to place your Ads on Web sites that are relevant to your company's product/service that you are promoting by using the account features of the ad placement service. We currently list only one ad placement service Bidvertiser. You will see on that Bidvertiser outperformed all the search engines in our study. They also were one of the least expensive when it came to our investment to use their service.

Search Engines: The search engine method is the most popular and very profitable IF you are using the right search engines, and if you have the proper guidance. The way the search engines work is that you will place your company or company you are promoting onto the selected search engines by typing short ads, then select a list of keywords that are relevant to the company you are promoting. You then will place your bid on how much you are willing to spend on any of those search term(s) when someone clicks on your ad. You can choose as low a .1¢ per click. You are then ONLY charged when someone searches one of the keywords you have selected and then clicks on your ad.
The amount you select for your keyword bids will determine where you are in the search engine, and how often your ads will be viewed. You can change your bid amounts at anytime to adjust whether you get more or fewer clicks. You will never be charged unless someone clicks on your ad. Therefore you are only spending money when you have a chance to earn money in return. What makes a good search engine successful is when you select good search keywords you get people who are looking for what you are promoting. It is only costing you pennies when you stand to gain $20, $30, $40, or more in return for a click that cost you a few cents. This is why people have become millionaires by using the search engines.

Many of the top PPC Web sites we list will offer sign-up bonuses ranging from $20 to $50. These companies are going to give this money to you to help you in your advertising cost per clicks. We will list the bonus features offered with each program.

Top Search Engine's

MSN (429%) - MSN is the third largest search engine in the world behind Yahoo, and Google. We have always done very well with MSN; as a matter of fact they are usually the top performer. MSN will cost more then Warplook or Search 123, but you will get the best exposure with MSN. There is no charge to join, and MSN only requires a $5 initial deposit towards your advertisement campaigns. A great choice when it comes to PPC search engine placement.

Search123 (402%)- Search123 is between Warplook and MSN when it comes to the number of clicks you will get. Their search engine is very simple to use and you can get clicks for very low rates. Search123 will require a $50 deposit towards your clicks, and once you make your first deposit, Search123 will give you an additional $20 for just signing up.

Adhere/Enhance Interactive (392%) - Adhere/Enhance is another very popular PPC search engine. Over 6 Billion searches a year. You can get clicks as low as .03 Cents. We also found a Bonus offer; join and deposit an initial $50.00, and Enhance will add an additional $25.00 to your account. Because Search123, Warplook, and Enhance are very close in their performances, and if you are having trouble deciding between these three search engines, we would suggest to go with Enhance for the good amount of traffic they receive.

Warplook (389%) - We will give you insight on how to use this search engine, and some great features that they offer. They are not the busiest of all the search engines, but they are very inexpensive and produce great results. No sign-up fee, and you can open your account for only $10 initial deposit which is applied towards your ad campaign clicks. If you open your account with $25. Warplook will match your deposit with an additional $25 bonus to get you started. You will see clicks as low as 1¢; with those low rates $10 will go along way. They accept credit cards as well as PayPal, so you can use their service if you do not have a credit card.

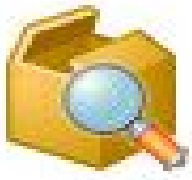
Yahoo is a good search engine as is recommended. However, it is very hard for affiliates to get their ad campaigns approved on Yahoo.

When using the search engines it is important to know the tricks that master Internet marketers have been using for years to create a nice income. We are going to show you the exact methods they have been using to assure you get the best chance to make a killing using these search engines.

The keywords is what usually can make the difference between a successful ad on a search engine, or a bad experience on a search engine. What exactly is a keyword? A keyword is simply the way a person types a search on the search engine. For example, if a person is looking for computer, they may type a search on the search engine such as "best computer." The term "best computer" is considered a keyword. Many of the search engines will keep track on how many times a keyword is searched with in a month's time. You can get the statistics on any search terms for many of these search engines we will show you how.

I will show you how use keywords with a special

SEO Book keyword search tool



—

The registration for all search engines is same:

Title: This is where you will catch the attention of the person searching your keywords attention.

Description: You will explain here in detail about the product(s), or services of the company you are promoting, including selling points, guarantees, bonuses, etc.

Web site URL: All search engines will have a separate spot where you place your Web site. Since you do not have a Web site, this is where you will place your PayDotCom affiliate promotion links, or Clickbank hoplinks. You will have the option to put the price of the company's product in your title. This can be good, and it can be bad. The good is that you know that the person searching will only click on your ad if they are interested in the price you are posting, and this can save you money on clicks. The bad is that you will not get as many clicks from people who could possibly be sold by the company's sales page. Many of these companies are designed to sell their product/service, even if a person had no intention to make a purchase. You can experiment with this option to see what works.

Typing your description

The next part of your search engine ad will be the description. You can now list some key selling points of the company you are promoting, such the guarantees that are offered, special discounts, bonuses, and a product or service description. We always suggest you research the Web site of the company you are promoting and make notes on the selling features to add into your description.

You do not need to change the description for each title you select. When you create new titles to match your keywords, you can use the same description. It will be easy to copy the description you have created and paste it in your computer's Word document or Note Pad. After you create each of your new titles, just copy and paste from Word or Note Pad into the description.

Web site URL

As you know you, will not need a Web site, but you do have your affiliate promotion link/hoplink for each of the companies you promote. This acts as your Web site URL, put that in whenever you are asked for Web site URL, or URL. You will place the complete URL including the "HTTP://".

Placing your bids for keywords

When selecting the amount of money you will pay for each of your keywords, you will want to make sure you are bidding high enough to get the exposure you will need. The amount of money you bid per click will determine where your ad will show up on the search engine when that particular keyword is searched. You can bid as low as 1¢ on some of the search engines, and as high as you would like. The number of clicks, along with the amount of money you are being charged for each of your keywords will be displayed for you to check at any time. You can see if you are getting enough clicks by checking these stats in your search engine management account. If you are not getting enough clicks, then up your bid amounts per click, and if your clicks are costing too much money, you will have the choice to either lower the bid amount, or delete the keyword all together.

If possible, go to the search engine and search for the keywords you are using. Locate where your ad is being displayed, and look to see which other companies are being promoted above you. Make sure that the same company you are promoting is not being promoted under the same keywords this can cause issues with the other person promoting getting the sales/commissions. If this happens you have two choices:

1.) Delete that particular keyword

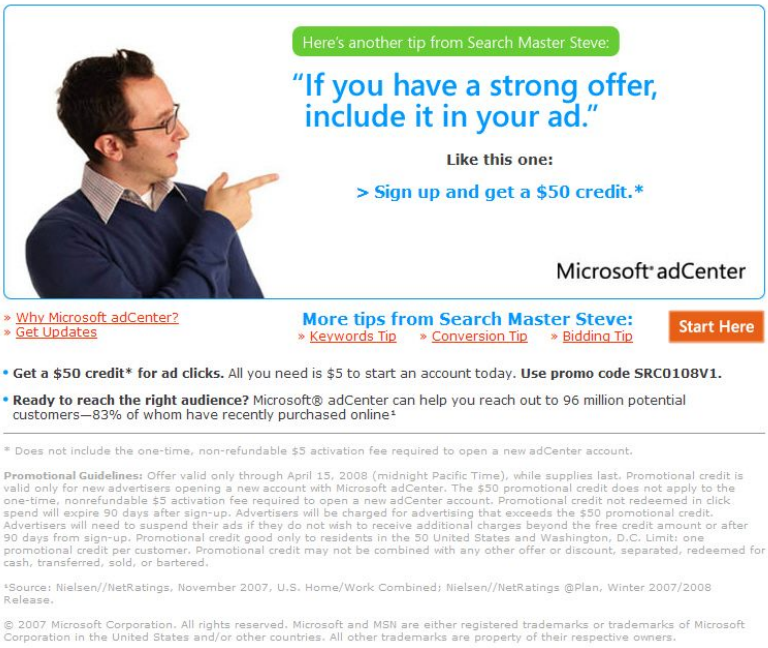
2.) Up your bid amount on that keyword to overtake the other person promoting the same company to get above them in the search rankings.

Here is how you will work with most of these search engines, you will put the amount of money you choose into your search engine account, whether you choose $10, $50, or $5000. You then type your ads, select your keywords, and state how much you are willing to spend on each click for your selected keywords. Your ads will run until the money in your account is depleted. The amount of money you have in your account, the amount you bid on each keyword, and how many clicks are made with that keyword onto the advertised site will determine how long it will take to deplete your funds. If you have $50 in your account and have bid 1¢ per keyword click, it may take a month or two to deplete your funds. If you have $10 in your account and have bid $5 per click (not recommended) then your account may be depleted in an hour.
Once your account is depleted of funds, your ads will stop, and it will be up to you to decide whether or not to add funds your account to restart your ads. Some search engines will offer an auto-fund option (not recommended) so if your account runs out of money it will automatically re-bill your credit card a preset amount to restart your ads. You should just keep an eye out when your account is getting low and refund it as needed. If you have some good ads that you are making a killing on, you will want to make sure you always keep your account funded so you do not lose earnings on your commissions. No ads = no money.

MSN Live will work a little differently. They will only charge you after you have received clicks. To avoid running up a big bill if not watched, MSN will allow you to set budgets. You can set a monthly budget if you choose and you will not get charged any more than your set budget amount. So if you only want to spend $30 a month, then you can set that amount.

Signing Up with Microsoft Search Network

Go to the MSN sign up page by **CLICKING HERE**



Step 2
Click on the **"Start Here"** button to continue. **IMPORTANT** - Make sure to write down the **"promo code"** that is displayed on this page to get your $50 sign-up bonus.

Step 3
Fill out the simple sign-up form by choosing your Username, Password, and your basic information. For the Company name, put your name, and for the "Industry" choose "Services," then click the **"Next"** button for the next page.

Step 4
MSN will require you to input the credit card you want to use with your MSN account. MSN will NOT charge your credit card until you have set up your advertisement campaigns, and only when you have accumulated costs from the clicks your ads have received.

Add your credit card information along with the Promo-Code you copied down from the first sign-up page so you can get the $50 sign up bonus.

Once you deposit you are charged your first $5 for your advertisements, MSN will deposit the $50 bonus to use towards your advertisement campaigns.

Make sure to check off the acceptance of terms and continue to the next page.

On the next page you can now login to your MSN account by clicking the **"SIGN IN"**

Your MSN Account Features

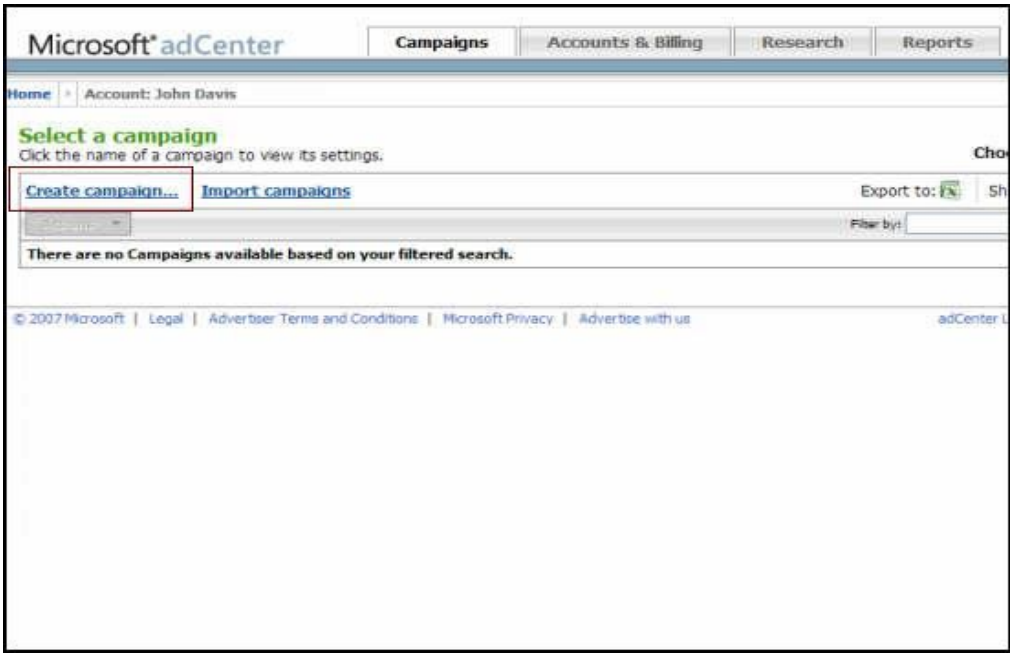
Campaigns: This is the main part of the account that will list all your current advertisements, keywords, bids, and costs. This is where you will create all of your advertisements.

Accounts & Billing: Your personal information is listed here, along with your credit card information. If you want to add, delete, or edit a credit card, this is where you will go.

Research: MSN has its own keyword research tool that you can use to get all your keywords for your advertisements.

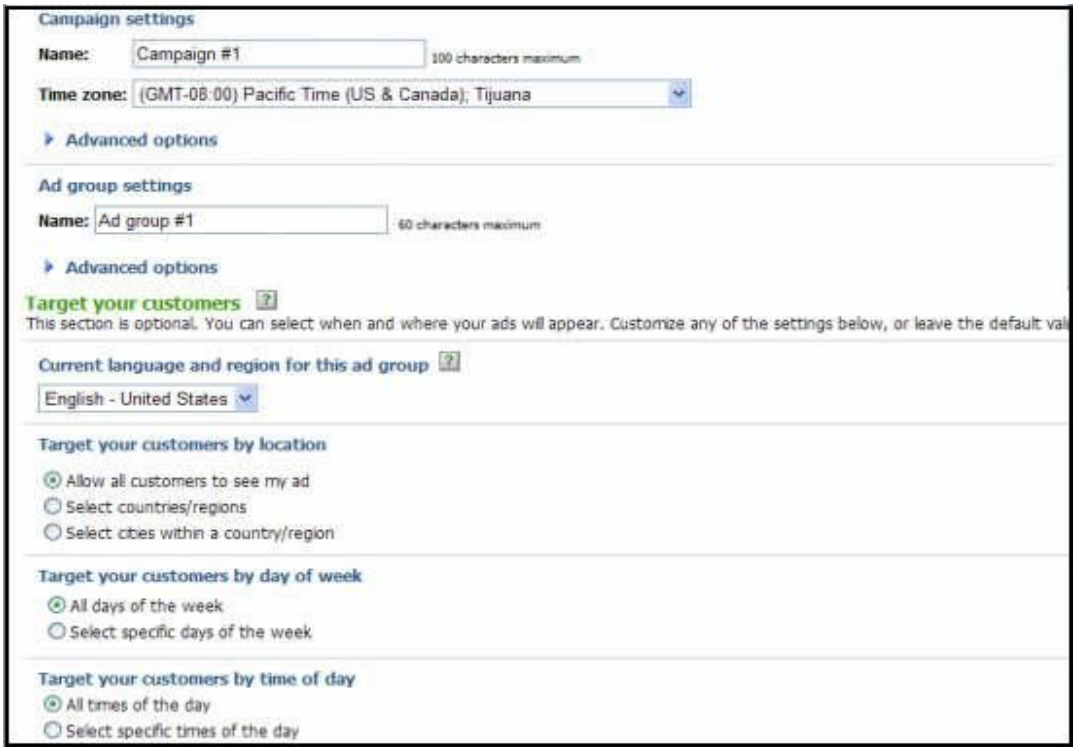
Reports: Get reports on your MSN account activity, including your cost and activities on your advertisements.

After you have researched your keywords, click on the **"Campaigns"** button to begin your advertisements. You will then be brought to the following main campaign account screen:



Creating your Advertisements

To create the advertisements you want to place in MSN's search engine, click the **"Create Campaign"** button. You will then be brought to the following page:



Campaign Settings - You can give your campaign an easy-to-remember name that you can use to keep your campaigns organized. You can use the default, which will number your campaigns as you go. Here you can also set your local time zone so all the reports will reflect your time zone.

Ad Group Name - You will want to name your ad group to reflect the company and keyword you have selected for your advertisement. This will make it easy to locate and to track.

The remaining default settings are the best way to go. However, if you do want to change these, you can.

After you have named your campaign and ad group, click the **"Continue"** button.

Ad Title For your ad title you will use the keyword you have selected.

Ad Text This is also known as your ad description. Here you will type more details about the company you are promoting, including any offers, guarantees, bonuses, and discounts the company you are promoting any offers.

Difference between **"Display URL"** and **"Destination URL"** you will have the choice of presentation using either a "Display URL" and a "Destination URL". The advantage of these options is that with the Display URL you will be able to use the actual Web site URL address of the company you are promoting, as opposed to placing your promotion link URL. When a person does a search and your ad is displayed, they will not see the long affiliate promotion link/hoplink, they will see the actual Web site. You will still get the credit for the commissions or leads because you will be placing your affiliate promotion link/hoplink in the destination URL, which is not displayed in the search, but is the actual destination of the link.

Display URL Use the company's Web site URL in this box.

Destination URL Here is where you place your affiliate promotion link/hoplink for the company you are typing the ad for.

After you have finished typing your advertisement, click on the **"Save"** button.

Next place a check mark in the selected ad you just typed and click on **"Continue."**

Adding the Keywords

Enter the keywords like: buy best computer

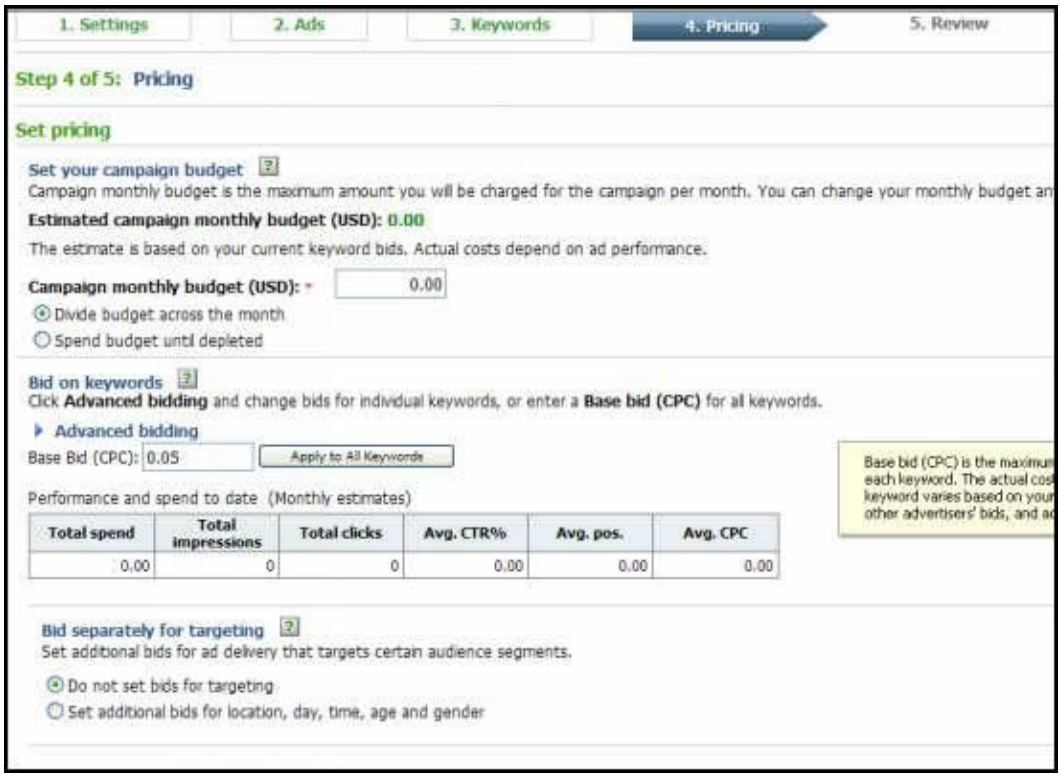
Enter one keyword per line and so many you want

In the **"Choose Keyword"** box you will place the keyword you used in your title of the advertisement. After you have typed your keyword, click on **"Add to Keyword List."**

Your keyword will now be saved in the lower box of the same screen,

Place a check mark by the keyword and click "Continue" and you will be at the following screen:

Setting Budgets and Bid for Keywords



Campaign Monthly Budget You can select the amount of money you are willing to spend for this particular keyword. The amount of your total budget for ALL your keywords. If you had 10 keywords total, and only wanted to spend a total of $100 for all your keywords, then you would want to place $10 for this keyword. (MSN Only) and will require at least $5.00 for you to place the ad on their search engine.

You will have the option to **"Divide budget across the month"** or **"Spend budget until depleted."**

Base Bid (CPC) Here is where you post how much you are willing to spend for each click, also known as CPC (Cost Per Click). MSN has a minimum of 5¢ CPC. Once your ad becomes active you will be able to determine whether this is too low, and if you chose a higher amount like $1.00 to start, you can lower this if it is too high. MSN will tell you exactly what position (1,2,3, etc.) you are in on their search engine with each keyword.

Default settings will work fine.

After you have selected your budget and CPC, click **"Done"**

MSN will usually approve all submitted ads within 24 hours.

You will see all your current advertisements/keywords listed on the main campaign page. You can add additional companies and keywords at your own discretion.

Signing up withSearch123

www.search123.com

Go to Advertieser Programm

Fill out the simple sign-up form by choosing your Login name, Password, and your basic information. For the Company name, put your name; for the "Account Categorization" selection choose "Miscellaneous", For your password you choose between 6to 8 characters. Agree to terms, then click the **"Create Account"**

After you click "Create Account" you will be brought to the login page.

Listings Whenever you want to add a new advertisement to Search123, you will click the **"Listing"** button.

Reports Get detailed performance and spending reports on all your advertisement campaigns.

Administration This is the current page that is showing, and the main page after you log into your account.

Edit Account Info You can change the contact information in your account info

Edit Credit Card Info You will add your credit card(s) on this page.

Search123 may need to verify your credit card and call you by phone at the phone number you list.

Fund Your Account Whenever you need to add additional funds to account,this is the button to click. You will need to start your account with an initial $50 deposit. *Search123 will then add an additional $20 one-time bonus to your account.*

Payment Options You can leave this at the default setting, which will NOT auto-bill you when your funds get depleted in your account.

*click on the **"Help"** button if you have any questions about how to use Search123. they offer some good support for their search engine PPC program.*

Adding Your Advertisements

To add your advertisements to Search123, click on the **"Listings"** button at the top of the page. On the "Listing View Page" you can set spending limits. Once your advertisements are set up, they will be displayed on this page, as we will show you at the end of this tutorial.
To add your advertisements, click on the **"Add a Listing"** button

Listing Title You want to make sure your keyword is in the title of your ads.

Listing Description Type a good description about the company you are promoting. make this personable as if you own the company you are promoting, by using words like "we," "mine," "I," and "Ours." Always use good selling points bonuses, guarantees, and discounts the company you are promoting offers in their Web site.

Target URL This will be where you place your affiliate promotion link for the company you are promoting to assure you get the commissions or lead-sale credit.

You will never promote adult content sites with our program, so check **"No"**

Adding Keywords

When done click on the **"OK"** button, click on the **"Add Keywords"** button to continue.

Now add the keyword you have placed in the title of your advertisement. You will not have a group to place this into. You can learn more how to organize you campaigns as you start to create more advertisements. Then you may choose to organize them into groups.

Setting Bid Prices on Your Keywords

When you have placed your keyword into the box, click the **"Next"** button
Leave the **"Match Type"** at the default **"EXACT"**

You will notice that Search123 will list the top five placements on their search engine for that particular keyword. You will want to select the first spot if it is reasonably priced. Whatever price is displayed in the "Max CPC #1" spot in the green box on the right, will be what you place in the "Maximum CPC" price column on the left.

You can always adjust your bids.

Confirm Your Advertisement for Publishing

After you have placed your bid, click the **'Next"** button to continue.

This page will be for you to review your ad and keyword before publishing. Click "Done" and you will be brought to a confirmation page. Again click **"Done"** and you will be brought back to your "Listing View" page

When your advertisements are displayed on your listing-view page, you can change your keyword bids, deactivate your ads, edit your advertisements, and add keywords.

To do another advertisement you will want to click on the **"Add a Listing"** button. You will then follow the same directions we just gave you.

and here two more..

7Search **Enhance Interactiv**

www.7search.com www.marchex.com/enhance-now-adhere

I am positive for now you have some ideas to do something for you self,

Building the website.

you want to build a website, or you are building it, look in the internet you'll find a lot tips, examples, links to useful services and resources, which teach you how to build a website as easily as possible...

1 Design

Your site needs to be clean, simple, and well-structured. The best Web site design includes informative content, simple layout, easy navigation and fast loading graphic

On the other hand, your Web site design is a reflection of your business, the quality of your product.

2 Web Hosting

Web hosting services offer you the wide range of features. Be sure to focus on the essentials that are required to launch your website. *Will you use all what you need?*

Online website builders are easy to use tools which anyone can use to build professional looking websites and have them hosted instantly. Some of them even enable creating free websites. No software to buy, no code to learn, all you need is to be a little Internet savvy and know how to click your mouse. Online website builders will save you weeks of work and allow you (or your clients) to easily maintain the site.

3 Domain Name

If you haven't purchased a domain yet it's best to buy one that includes one of your **most profitable keywords** for higher relevancy. The engines will rank your site higher for your keyword if it's included in your domain name. Domain names include the Top Level Domain (TLD). The most popular TLDs are .com, .org, .net, info.The cost approximately $10 - $19 yearly.

4 HTML Codes

The WYSIWYG HTML editors allow beginners to build complex Web pages by simply "dragging and dropping" onto the work area. These programs eliminate the need to learn HTML, so you can concentrate on the look of your page. And again it have to include all tools for you product, if you want to sell digital product make sure you Domain offer you a shop car function with PayPal transferring.

Last Part

companies will pay you,

and who Is going to pay You?

When you select a company you want to market for

I will explain opportunitie and sources of income that will pay you for your article typing and blog postings.

What is a Blog?

A weblog, is a Web Site where regular entries are made (such as in a journal or diary) and presented in reverse chronological order. Blogs often offer commentary or news on a particular subject, such as food, politics, or local news; some function as more personal online diaries. A typical blog combines text, images, and links to other blogs, web pages, and other media related to its topic. Most blogs are primarily textual although many focus on photographs, videos or audio. The word blog can also be used as a verb, meaning adding an entry to a blog.

The difference between a blog and a traditional Web site is the way in which they are updated. Web sites are typically static content, updated only periodically, where as blog technology allows a user to update the content as often, or as quickly as they like. Originally blogs were used by individuals as publicly available online journals. In the past few years, businesses and politicians have started to discover the power of the blog, and their popularity and use has taken off.

One way blogs and Web sites differ is in the way that search engines view them. Because of the static nature of a website search engines visit them relatively in-frequently making it difficult for a site to get noticed and listed in search results. Blogs on the other had are visited often by search engine spiders due to their dynamic content nature of posts. It's much easier to get a blog ranked high in the search engines compared to Web sites**.**

It's very easy to set up a blog. You can set up a blog in less then five minutes. The nice thing about a blog is that it's like having your own Web site but you don't have to learn how to make a Web site or pay someone to host it. It is 100% FREE.

Blogger.com Once you set up a blog you can add "posts" to your blog every hour, day, week or month. You can add pictures to your blog and let other people post to your blog.

Income Sources on Your Blogs

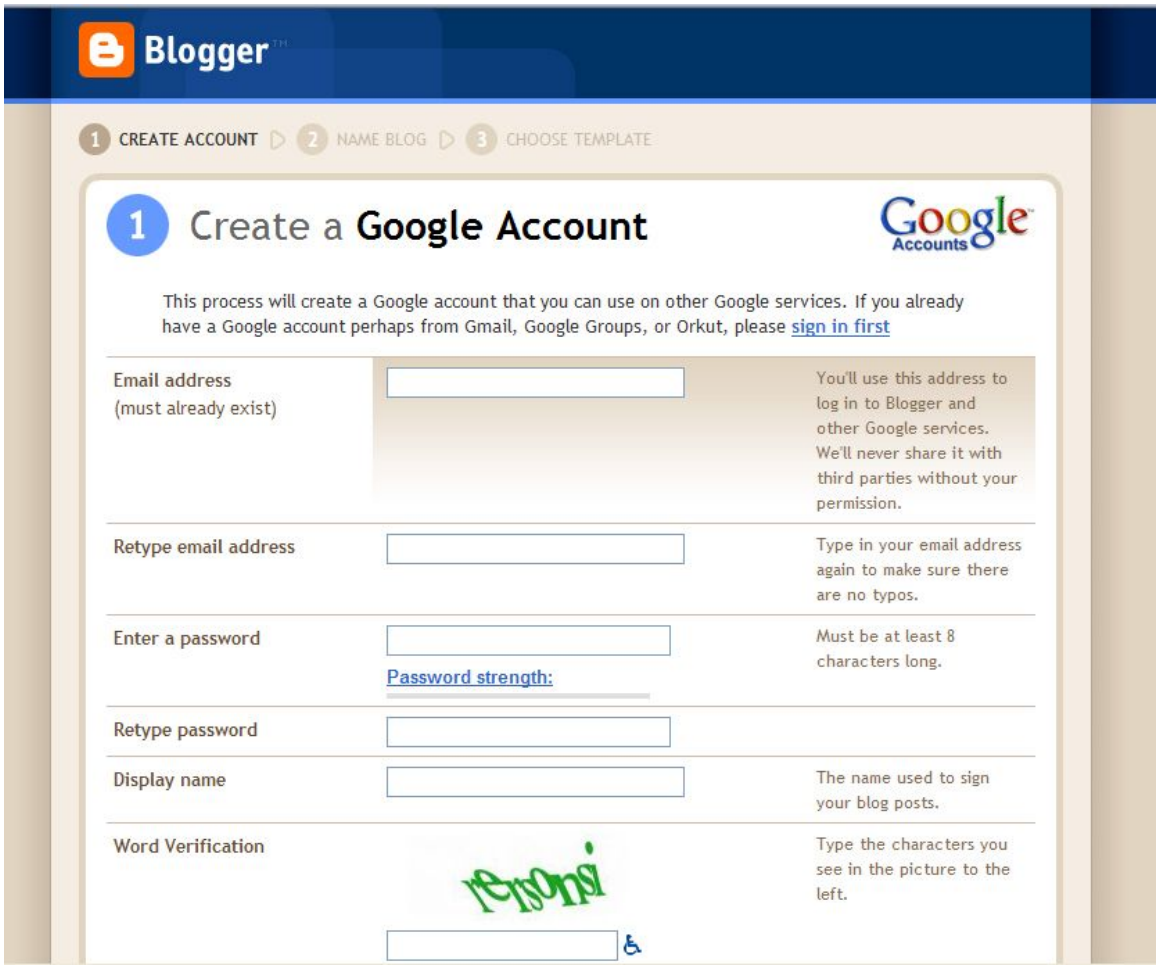
Googles Adsense.

You will be able to place Google AdSense code into your blog posts. Once posted, the code then appears as an ad. When users click the ad, you make money. The price you make per click varies each time but can sometimes be more then just a few bucks. It all depends on the market/niche your blog falls into. Google's AdSense will pull ads relating to the content on your blogs.

Banners promoting products can be put on blogs.
Some companies will set you up with companies that will pay to place promotion banners on you blogs. These companies realize the importance of blogs and how effective they are in creating traffic and sales to their site. You can make anywhere from $5 to $35 or more per day for these banners to be placed on your blogs

Affiliate Links can be placed in blog Entries
Another way is by promoting affiliate links such as PayDotCom and/or Clickbank which I give a complete tutorial. You can sign up with relevant affiliate programs, then promote them on your blog. You can make a review on affiliate product,when a visitor reads your review and clicks the links and buys the product, you earn money. You can also add affiliate links to the menus in your blog, your signature lines, etc.

Sing Up



CREATE A GOOGLE ACCOUNT

This is a different account then the Google Adsense you signed up earlier.

1.Enter your e-mail address here (preferably the same one you used to sign up for Google Adsense with.This will make it easier to remember when logging in later.

2.Choose a password

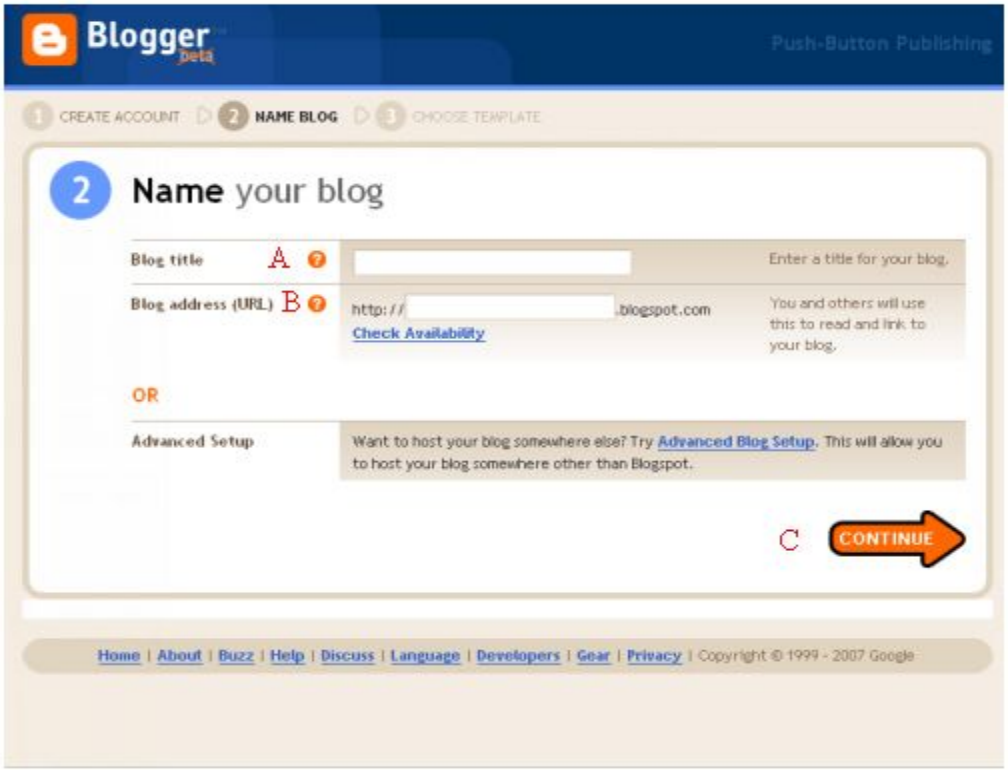
3.Retype your password

4.Choose a display name, this will be displayed on all of your blogs

5.Type the word verification that is displayed on YOUR sign up page

6.Check off the Accept Terms

7.After all done, click Continue.



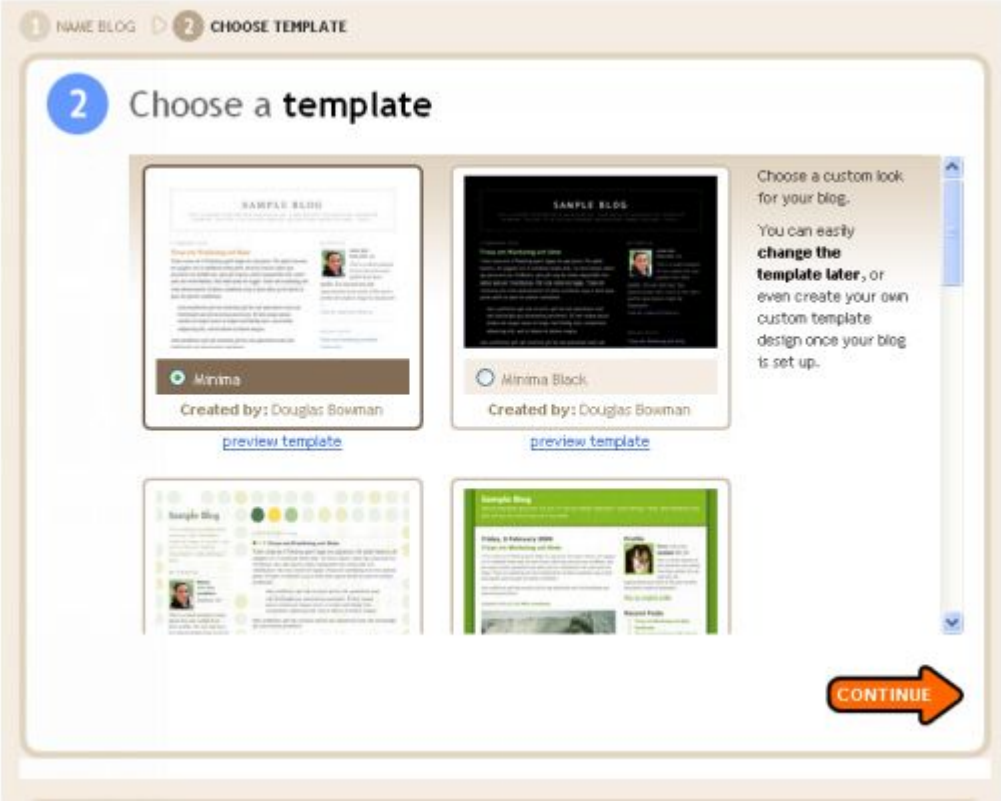
NAME YOUR BLOG

A.) Select a blog title that best fits your blog subject. This is only for your personal information for categorizing your blogs in your blogs account page.

B.) Select your blog address URL - This is what will appear in your url address you place in your internet browser. If you are creating a Dig- Technology blog then try something like: "dig-infonet" as an example. So if you chose this as your blog address Url, your complete URL address would be **http://dig-infonet.blogspot.com/** This is how others will be able to access your blog Web site**.**

C.) After all has been completed click Continue

Now "Choose Your Template" layout



CHOOSE YOUR TEMPLATE LAYOUT

You can choose from a variety of template layouts. This is how your blog will appear when someone clicks on it. After you finished your selection, click "Continue."You will then be taken to a screen to start posting, click on the "Start Posting."

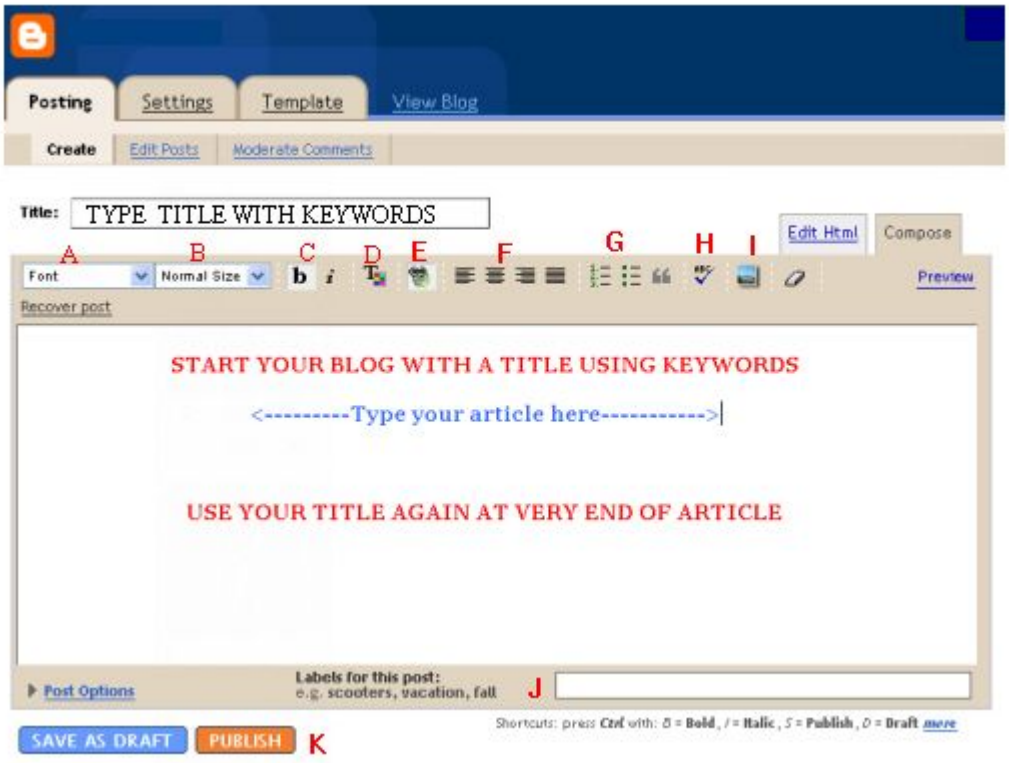
POSTING TO YOUR BLOG

SELECTING A TITLE

first you will need to select a title for your blog, using the tips I gave you earlier on how to incorporate keywords into title. So if you are writing a blog on dog training, then you can select a title like "Dog Training Tips" Thus you use a very popular keyword for the search engines in your title. The search engines use this to index you for search results.

You can go to the following Web site for a handy keyword-selecting tool **that will** help you select popular keywords for your blog titles. The site is Icon Interactive; you will type in a broad word and all related searches using that word are displayed with the number of times it has been searched with in a month's period. As an example, you would type a search for "COMPUTER" or "COMPUTER TRAINING" and find related search terms that are relevant to the subject you are searching. Don't always choose the keywords that get searched the most, choose the ones that best fit your subject. You would see that COMPUTER gets searched 100 times more than COMPUTER TRAINING, but COMPUTER would be too broad of a search term as compared to COMPUTER TRAINING which is what you are typing your article about.

HERE IS ICON INTERACTIVE'S KEYWORD SELECTING TOOL



POSTING TO YOUR BLOG

Using The Posting Tools

A.) Change the text font.

B.) Change the size of your text.

C.) Select Bold or Inverted text.

D.) Select the color of your text.

E.) Link Web sites to your text - You can tie Clickbank Web sites to a slogan or saying. As an example you might want to use "To find out more GO HERE", To do this, click your mouse over the GO HERE until highlighted, then click on the Link button (E) a separate window will pop up for you to add your Affiliate URL and click OK to link your Clickbank Web site you are promoting to that GO HERE. You can use this to link to other Web sites as well.

F.) Change the text postilion on blog, Left, Center, Right.

G.) Add side margins to text.

H.) Spell-check your blog with this button.

I.) Upload and add pictures to your blog with this button.

J.) Enter whatever labels you like, separating them with commas. You can also click the "Show All" link to display a list of the labels you've used previously. Then just click on the labels to add them. When you publish your post, the labels will be listed with it. Clicking any of the labels will take you to a page containing only posts with that label.

Labels are handy if you blog about a lot of different subjects, since readers can then choose to view all of your posts on, say, dogs at once. Or politics, or knitting, or whatever you happen to be writing about. THESE ARE OPTIONAL and not required.

K.) Once you are satisfied with your blog, click on "Publish" to publish your blog to Internet.

After you have published your blog, you will be taken to a screen that says
"Your blog post published successfully!"

Placing Google Adsense On Your Blogs
Now we are going to show you how to add Google AdSense to your blogs. You will need to click on the Template button located in your blogger menu. After you get to the template page click on "ADD A PAGE ELEMENT" You Then Will Have a separate Window Open Up Choose A New Page Element

1 Click On Adsense "ADD TO BLOG"

2 The next page you come to click on
Already have an Adsense account? Sign in.

On the next page you will have to enter the Google AdSense e-mail address that you used to sign up with Google AdSense. Then choose EITHER your zip code OR the phone number you have listed in your Google AdSense account. This is needed so you can be verified and approval can be given to Blogger.com to post AdSense ads on your blogs. Don't worry Blogger.com will NOT have access to your Google AdSense account or any of your personal information, just the codes they need.

You will also need to log into your Google Adsense account and click on "My Account" and then click on "Account Access" and allow Blogger.com access to your codes.

4 After you submit your e-mail address and zip code OR your phone number, click "OK" and you will then be able to select the Google AdSense layout and ad style y chosen your layout and ad style, click on "Save Changes". The Google ads will now be displayed on your blog. You can now access your template page any time you want to change the layout or ad style. You now have Google AdSense.

STEP 4
Adding Additional Side bar Links To Blog
You can also add more links to your blog on the side bar or at bottom of your page, such as additional affiliate promotion links/hoplinks for PayDotCom and Clickbank companies or links to other Web sites.

1 **-** Go to your Template page and again click on
"ADD A PAGE ELEMENT"

2 **-**When the separate window pops up, click on the "Link List" which is the first option at the top right and click on
"ADD TO BLOG".

3 - Enter the Web site you would liketo add as follows

A.)Title - This is what the link will say on your blog.
B.) Leave Blank.

C.)Select how you want your links sorted on your blog.
D.)Enter the Web site URL; the http:// is already given. This is where you would add promotion links.
E.)Add the website name.
F.)When done click on "Save Changes."

You can add as many links as you would like to your blog

Adding Meta Tags

This is one of the most important parts of getting your blog indexed to the search engines. You want to add what is called meta tags to the html code of your blog. This will allow search engines such as Google, MSN and Yahoo to properly read your blog. This is much easier than I am making it sound so wewill just walk you through this process.

The first thing is to edit the following Meta Tag BEFORE you insert it into your blog.We will use one of our meta tags for a pctv blog**.**

```
<meta name="revisit-after" content="5 days"></meta>
<meta name="classification" content="Entertainment - Site"></meta>
<meta name="description" content="A review of pc tv services"></meta>
<meta name="MSSmartTagsPreventParsing" content="TRUE"></meta>
<meta name="keywords" content="watch tv on pc,tv for pc,watch tv on computer"></meta>
<meta name="robots" content="FOLLOW"></meta>
<meta name="distribution" content="Global"></meta>
<meta name="rating" content="Safe For Kids"></meta>
<meta name="author" content="Your Name Here"></meta>
<meta http-equiv="reply-to" content=" Your E-Mail Address"></meta>
<meta name="language" content="English"></meta>
<meta name="doc-type" content="Public"></meta>
```

Only edit what is in RED to match the subject and content of your blog.

Classification - Will be a general category for your blog subject.

Description - A brief description of your blog's subject.

Keywords - This is where you can add keywords that best fit your blog subject. Use the Icon Interactive tool to help you choose

keywords. Add about 4-6 good keywords that really explain what your blog is about.

Author - This can be either your blog nickname or your real name

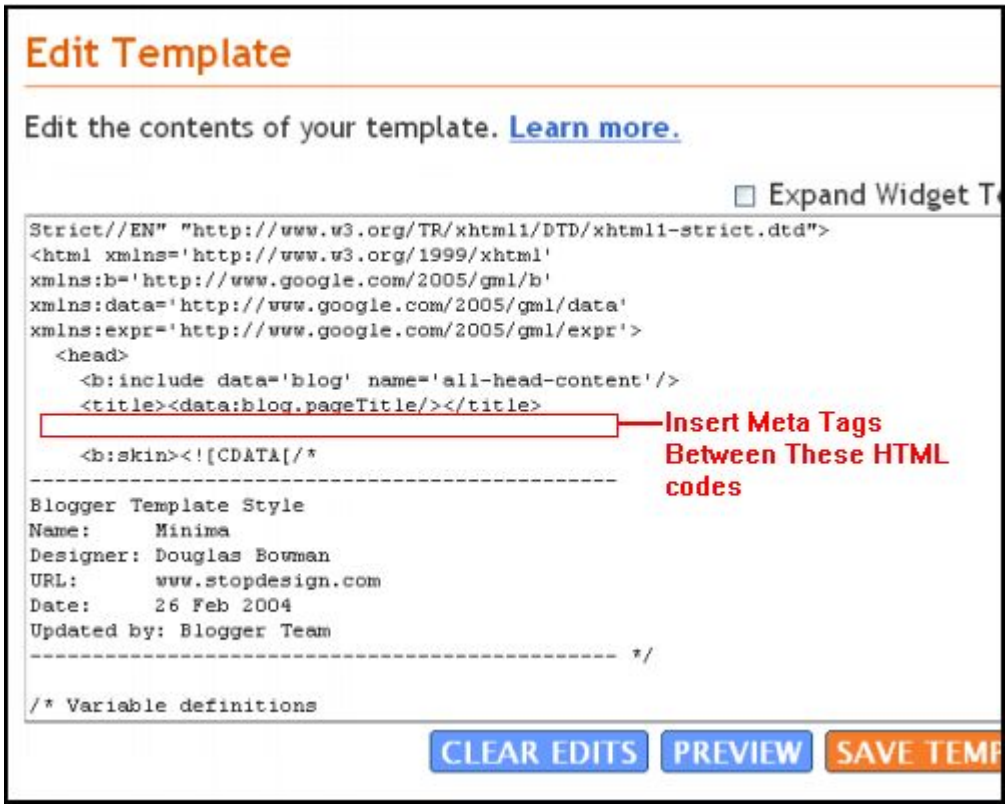
Reply-To - Add your e-mail address here

After you have edited this code to match your content, you insert this ENTIRE code into your blog as follows.

1 **-** Go to you Template Page again.

2 - Click on Edit HTML

3 -At the top of page you will see the following codes:



Copy and Paste the COMPLETE code you have edited between the followingtags shown above. The code will be under the:

<b:include data='blog' name='all-head-content'/>
<title><data:blog.pageTitle/></title>
And above the:
<b:skin><![CDATA[/*

4 After you have pasted the code in the template, click on "Save Template."

IMPORTANT
Remember where this code is located because you will need to add a GOOGLE verification Meta Tag in this location when I have you post your blog to GOOGLE.

If you have problem posting the meta tags to the "Template" of you blog, you can post it as follows: Go to ADD PAGE ELEMENT, then select HTML/JAVASCRIPT, and place the entire code there.

You are done setting up your blog. Remember to make new postings every day. You want to always Create NEW postings. This will add fresh content to your blogs and help index your blogs to the search engines much quicker. The postings after your original article do not have to be long I usually will just add another paragraph. After about 10 days, you can post to your blog three times a week.

That's it

And now

I will give you a last quick run down along with some tips on the different types of work-at-home jobs

The data entry jobs will be for the experienced in certain fields, to little or no experience needed. With our training we will get you the basic skills needed to do many of these outsourced work-from-home data entry jobs.

How much can a work-from-home word processor make?
Median annual earnings of work-from-home word processors and typists in May 2006 were $30,030. The middle 50 percent earned between $23,850 and $35,900. The lowest 10 percent earned less than $19,960, while the highest 10 percent earned more than $46,190. The salaries of these workers vary by industry and by region. Many home typers do not spend more then 4 hours per days, 5 days a week working from home. If you were to work more hours per day you would make more money. Expect on a beginner level to make $10 per hour, and on an advance level about $18-$20+ per hour.

Here are the type of work you can do as a data-entry operator

- WORD PROCESSING
- LETTERS, REPORTS, JOURNALS
- MANUSCRIPTS, NOVELS, NON-FICTION
- DISSERTATIONS, THESES
- PROOF READING, INDEXING
- COPY EDITING (LIGHT & SUBSTANTIVE)
- COPY WRITING
- MAILSHOTS (SNAIL MAIL, EMAIL, FAX), LABELS
- POWERPOINT PRESENTATIONS
- DIGITAL DICTATION
- VIDEO & MINI DISC TRANSCRIBING
- CONFERENCE PROCEEDINGS
- RESEARCH INTERVIEW TRANSCRIPTION
- OVERHEADS / SLIDE PRESENTATIONS
- CVS / RESUMES
- MINUTES
- INVOICES / STATEMENTS
- E-MAILS, FAXES

• DESKTOP PUBLISHING • NEWSLETTERS, BROCHURES • DATA ENTY KEYING • VIRTUAL OFFICE MANAGEMENT • TERM PAPERS • ACADEMIC ESSAYS • LECTURES, SPEECHES • AUDIO TYPING TAPE TRANSCRIPTION • MINI OR MICRO CASSETTES • STANDARD AUDIO TAPES	• BOOK-KEEPING, VAT • MEETINGS, EVENT PLANNING • DOCUMENT / PHOTO SCANNING • RESEARCH • SPREADSHEETS • DATABASES, DATA PROCESSING • DOCUMENT FORMA

We have listed on this page a large amount of outsourced data entry jobs

Remember the following jobs will need you to apply to receive work

DION DATA SOLUTIONS
Must type at least 55 wpm with accuracy. Computer Skills including internet, e-mail, e-mail attachments, downloading and uploading files. Ability to work independently

VIRTUAL CUSTOMER SUPPORT
Customer service interaction via email, telephone, and live support from their website

CONTINENTAL PROMOTION GROUP
Data entry work is paid by the piece. Each consumer rebate submission that you enter will be paid at a pre-determined rate per piece.

SMITHFIELD ASSOCIATES
Document Processors - $10 - $13 per hour.

KEENE TEAM
Virtual Clerical Office Assistants.

Here is the first way to earn some extra cash by posting articles to the Internet.

You are going to use your Google AdSense account to make money from your original contributions to the AdSense Revenue Sharing Forums that we will list for you. You will sign up for free to the selected forums and enter your Google Adsense account ID in your profile. Google AdSense ads will be displayed with your original content, and 50% - 100% of the revenue generated from these ads will be credited to your Google AdSense account.

On every thread you start, one out of three page views will display your AdSense ID instead of that of the forum's adsense account. This means that when people click the ads on your threads, you earn money. Threads are new posts you will create on any subject matter you choose. Just read each forum's guidelines if they have posting criteria you must meet. Most of these will allow most any type of posting that is not vulgar or profane.

These companies will add a check to make sure AdSense adverts are never served to members with their own publisher-id (to prevent them clicking their own ads and violating Google's own clicking policy).

Tips When Signing-up for the Following AdSense Sharing Forums

1. Make sure to enter your Google Adsense Publisher ID when asked.
2. You DO NOT need to answer any of the following if asked AdSense Channel AdSense Channel for AdLink AdSense Channel for Search

3.Make sure you read the terms or guidelines so you can stay in compliance.
4.Read other posts to get an idea of how much content you should provide.

Here is a list of the top adSense sharing companies,
sign up for one or sign up for all

DIGITAL POINT
This forum displays one Google AdSense advertisement in the upper right area, as well as in line when viewing a post thread. They use Google AdSense to automatically serve relevant ads for the content on the page. Google pays AdSense publishers on a per click basis as well as per impression. You will enter your Google AdSense publisher ID in the account option "EDIT OPTIONS."You can add your comments to existing posts and have your Google AdSense displayed, or create new post topics and have your Google AdSense displayed to start earning money. Take a look at the forums to get an idea on how it all works. You can create a profile signature which will allow you to add a blog or a Web site if you have one.

SHARE YOUR EXPERTISE
This program will pay the best on revenue-sharing with your Google AdSense. Although most revenue-sharing forums are 50/50 in sharing your AdSense and their AdSense, this site will show your AdSense 70% of the time for a 70/30 split. You can also add affiliate IDs from the sites we showed you in Blog Articles Part 1(LinkShare, ClickBank, PayDotCom, and Commission Junction) so you can promote any of the thousands of companies and earn additional money if you choose. ShareYourExperience.com will do the advertising for you and split your earnings for that as well. When you use ShareYourExperience.com you can submit articles,comments and promote your favorites and get paid. You will enter your Google AdSense publisher ID in the sign-up process. All other information in sign-up such as "Auction Ad ID" (ebay), Interests are optional. If you run auctions in eBay you can add your Auction ID and have your auctions show.

50/50 ARTICLES
After you enroll as an Author, you will be able to enter your unique Google AdSense publisher ID code into the system. From that point on, when a visitor visits any of your articles or blog posts, the Google AdSense ads will display every other time, using your I.D. Therefore, 5050Articles will be splitting the Google AdSense earnings with you. When one person visits your article or blog post, your Google AdSense will be shown. The next time someone views one of your articles or blog posts, 5050Article's Google AdSense will be shown. Everything is split 50/50! You will enter your Google AdSense publisher ID in the sign-up process; you can also add a picture of you if you choose. Create articles on any topics in the many categories that are provided and have your Google AdSense displayed to start earning money.

ARTICLES REVENUE
Ad revenue will be shared between all active authors of this site. This site displays advertisements when you view it. They use Google AdSense to automatically serve relevant ads for the content on the page of your articles. Google pays AdSense publishers on a per click basis as well as per impression. You will enter your Google AdSense publisher ID in the sign up process; you can also add a picture of you if you choose. Create articles on any topics and have your Google AdSense displayed to start earning money.

REVIEW PARTY
You will type articles, reviews on books, music and DVD (movies and television), more options are being added. Add your Google AdSense Publisher ID to your review pages and share revenue every time your Google AdSense is clicked on. Review Party will also allow you to add Amazon.com affiliate codes so you can display Amazon products as well. If you would like to sign

up for Amazon you can go HERE. You will make commissions on any of the products sold through your link. So get paid two ways, Google AdSense and Amazon.com products.

XOMBA
Xomba will split the ad revenue with you 50/50 on everything you post. The more you post, the more you make. You can add your comments to existing posts and have your Google AdSense displayed, or create new post topics and have your Google AdSense displayed to start earning money. You will add your Google AdSense publisher ID in your Xomba main account page by clicking on "EDIT" then select the sub-menu button "ADSENSE."

INDIA STUDY CHANNEL
This is a great forum, as you will see everything from intellectual studies, to online puzzles, to jokes on the forum board. You can submit articles on anything you would like, post stories, jokes, puzzles, play games etc. You will get paid with your Google AdSense that is posted along with your articles or posts. You can also make money with other programs they offer as well.Here is how you will add your Google AdSense publisher ID. When you sign up you will be asked to invite friends, click "CANCEL" and you will be brought to your main account page. Here you can edit your profile, upload pictures etc. On this page you will see the option "MANAGE REVENUE SHARING." Click on that to set up your Google AdSense. IndiaStudyChannel.com will use a different method to add your Google AdSense publisher ID, as they will verify your Google account and add your ID automatically. To do this click on the "Create a new account or associate an existing AdSense account." After you click that link you will then select "Associate an existing Google AdSense account." Follow the instructions on the page which will ask you some information from your Google AdSense account to verify your Google account. After the verification your Google AdSense will be placed in all of your posts, articles etc.
